

## **NFL PICK 5 POOL GUIDELINES**

\$5 weekly entry fee

Same spreads and deadlines apply as in the above pick em pool

You pick 5 games each week. Your picks represent the games you are most sure about. All 5 games must win against the spread to win. If no player wins all 5 games in a week the pot will carry to the next week. Each week is a winner take all pot, no tie breaks, if more than one player wins their 5 games the total pot for that week is split equally amongst the winners.

You can join in on any week. You can leave the pool and return on any week. If you choose to join a week with a carry over you must pay the entry fee of any carry over weeks. For example if you want to play in week 6 and there was a carry from weeks 4 and 5 you must pay \$30 to play week 6.

The pick 5 pool ends with the regular NFL football season and does not include playoffs. If there are no winners in week 17 the winner will revert back to 4 wins

## **NFL SURVIVOR POOL GUIDELINES**

One time \$10 entry for the year, 1 winner take all.

You pick one team to win each week straight up no spread, you can only select a team once. If that team loses you are out. Last player in the pool takes all.

If more than one remaining player is eliminated to end the pool the pot will split between the remaining entrants for example, going into week 3 players remain and all three lose that week those 3 split the pot.
